The government recognises that SMEs are a major factor in the New Zealand economy and has set up this scheme to encourage growth through the development of the management capabilities of small business owners and managers. The scheme provides a 50% subsidy up to a maximum of \$5,000 plus GST in a financial year for Business Coaching and Training from approved suppliers. We are contracted suppliers under this scheme. We will provide a **free** consultation process (**worth \$500**) if you register with us, to assist with your application.
